Awards and Certifications

“Certified Consulting Meteorologist” A.M.S. Designation

February 2014 to Present

- The CCM designation is issued by the Society to highly qualified meteorologists providing research and services to a wide variety of users of weather information. These services extend beyond the traditional public service functions and statutory responsibilities of the National Weather Service. To earn the CCM credential, a meteorologist must make application for the designation, be recommended by three associates, pass a stringent written examination, and pass an verbal examination before a national board of examiners. The CCM designation is granted only to those who demonstrate a broad background in meteorology together with detailed knowledge in a particular field of specialization. CCMs must demonstrate exemplary qualities of character and devotion to high professional standards.

National Oceanic and Atmospheric Administration and University of Oklahoma Certification for “Decision-Making Using Dual Polarization Radar”

2015

- One of the 1st non-government meteorologist in the country to complete a 40-hour course using Doppler radar and Dual Polarization technology to identify severe hail, tornadoes, wind events, and differences between rain, hail, and wintry precipitation.
- Attended 3 day workshop and laboratory instruction.
- Verbal examination in front of instructors required demonstration and identification of various dual polarization Doppler radar features and events.

A.M.S. “T.V. Seal of Approval” Designation

2001

- The “Seal of Approval” is awarded by the society to broadcast meteorologists who meet established criteria for scientific competence and effective communication skills in their weather presentations. The application is judged by a national board of examiners to assess four elements: technical competence, informational value, explanatory value, and communication skills.

EMMY Award for Outstanding Single Newscast

May 1998

- Provided a live broadcast, news coverage, and interview with a NOAA storms survey team following an F3 tornado in Mechanicville, New York.
